Subject: Microsoft Settlement

I am a United States citizen, living in Canada. I strongly object to the proposed final settlement in the Microsoft antitrust case. I feel it still leaves Microsoft in a position to stifle innovation by the sheer volume of the market segment it controls. While I do believe in free enterprise, it seems obvious that Microsoft behaves (and will continue to do so if this case is settled as proposed) in a belligerent manner to its competition.

Please think very carefully before moving forward on this...

Regards

Richard Nolan
